

VNC Neurological Exam

Date:
Examiner:

Mentation: appropriate/demented/delirious

Arousal: alert/obtunded/stuporous/comatose

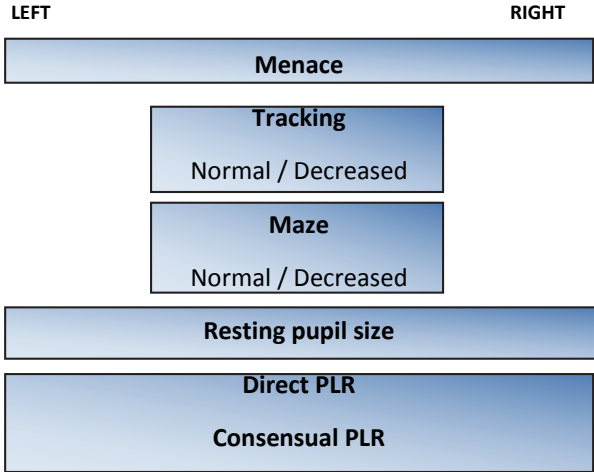

Posture:

Normal		
Tilt	left	mild
Lean	right	moderate
Turn		severe

Gait:

Normal	left	mild
Ataxia	right	moderate
Paresis	fore	severe
Hypermetria	hind	
Lameness		

Cranial Nerves

Eye position
Normal
Strabismus
Spontaneous / Positional
Dorsal / Left Lateral / Right Lateral Recumbancy
Dorsal / Ventral / Medial / Lateral
Enophthalmos
Exophthalmos

Nystagmus
Normal Physiologic
Spontaneous / Positional
Dorsal / Left Lateral / Right Lateral Recumbancy
Horizontal / Rotary / Vertical
Dysconjugate
Fast Phase Right / Fast Phase Left

Facial muscles
Ear droop
Lip droop
Nose deviation
Palpebral Reflex

Facial sensation
Medial canthus
Lateral canthus/nose
Chin

Masticatory muscles
Normal
Decreased

Gag reflex
Normal / Decreased

Tongue movement
Normal / Decreased

Postural Reactions

LEFT

RIGHT

Proprioceptive Positioning

Thoracic

Pelvic

Wheelbarrow

Placing

Thoracic

Pelvic

Hopping

Thoracic

Pelvic

Extensor postural thrust

Hemihopping

Hyperesthesia

None

Neck : Lateral/Dorsal/Ventral

Thoracic: Cranial /Middle/Caudal

Lumbar: Cranial/Middle/Caudal

Sacral

Coccygeal

Muscular

Other Findings

Spinal Reflexes

LEFT

RIGHT

Extensor Carpi Radialis

Triceps

Withdrawal

Thoracic

Pelvic

Patellar

Cranial Tibial

LOCALIZATION

Muscle Mass
